UNIVERSITY OF SALERNO

The AXA Research Fund (http://www.axa-research.org/how-to-obtain-funding) **assigned to the University of Salerno the right to propose a Post-Doctoral candidate for the second round of the Post-Doctoral Fellowship 2013**. NB: The AXA Research Fund grants 30 Post-Doctoral fellowships per year, with a global selection rate of 10 to 15%. Details on the funding scheme are published on the "Post-Doctoral application Guidelines" (http://www.axa-research.org/sites/dev/files/A-Howtoobtain-Modus/Post-Doc2013.pdf).

PRE-SELECTION CALL BY THE UNIVERSITY OF SALERNO

The University of Salerno seeks applications for the **internal pre-selection** of **one candidate** to propose for the second round of the AXA Post-Doctoral Fellowship 2013. Selection criteria and documents required for the pre-selection call are the same ones the selected candidate will submit to AXA to participate to the second round of the selection process.

The candidate is asked to submit a research project dealing with the following topic:

Risks due to natural and anthropogenic hazards, such as landslide and/or subsidence phenomena, to which different kind of elements (people, property, cultural and environmental heritage, etc.) are exposed.

Project proposals should cover, at least, two of the following key aspects:

- Quantitative landslide and/or subsidence risk assessment
- Innovative monitoring techniques
- Exposed elements
- Impact on current practices of risk management
- Relations with financial instruments (including insurance) of landslide risk mitigation and/or subsidence

Selection criteria

- Academic excellence
- Innovative nature and originality of the project
- Feasibility of the project (management, organization, budget)
- International mobility: high value is placed on candidates who have spent, since their Master's Thesis, a minimum of 1 semester abroad dedicated to field work, academic studies, research or/and to conferences, or plan to spend a minimum of 1 semester abroad during the course of their Postdoc studies.
- No more than 5 years between PhD defense and start of PostDoc project (valued but not required)
- Ability to transmit his/her work and popularize his/her research

UNIVERSITY OF SALERNO

Applicants must comply with the following conditions

- Applications must be filled out in English
- Candidates must have defended their PhD thesis before the beginning of their Post Doctoral grant
- Projects that are already under way are thus not eligible for funding with the ARF
- ARF PostDoc grants are not compatible with permanent academic positions

Documents required for the submission (pdf format)

- Detailed description of the PostDoctoral project (4 pages max, not counting bibliographical references)
- Additional documents such as dissertation summary, articles abstracts, research schedule for the submitted proposal –highly recommended– (20 pages max)
- Detailed CV
- Letter of recommendation

Deadline for applications

15 March 2013

Submission procedure

The documents required for the submission should be attached, as pdf files, to a submission email addressed to **laram@unisa.it**
Subject: AXA research Fund pre-selection
Body of message:
1st line = NAME: "your Last Name" "your First Name"
2nd line = UNIVERSITY: "Name of PhD University"
3rd line = COUNTRY: "Country of PhD University"
4th line = FIELD: "PhD Field"
5th line = TUTOR: "Name of PhD Tutor"
6th line = RECOMMENDER: "Name of Recommender", "email of Recommender"
