LARAM School 2012 – 2nd Asia Course

″滑坡灾害风险评价与管理" 国际博士课程2012

International PhD course on "Landslide Risk Assessment and Management”

LARAM is an International School on "LAndslide Risk Assessment and Mitigation" that was founded on 12th April 2005 by the University of Salerno (www.laram.unisa.it). The Scientific Committee consists of international experts in the fields of Landslide Risk.

The School is held annually and is aimed at **40 PhD students** selected every year from those working in the field of: Civil Engineering, Environmental Engineering, Engineering Geology or other related studies.

The School is also open to a **maximum of 20 Young Doctors** who have discussed their PhD dissertation not earlier than 2006.

The main **objectives** of LARAM are:

1. to establish an annual 2 weeks high-level course for PhD students from all Countries, with international experts on landslide risk assessment and mitigation as teaching staff;
2. to develop high educational interdisciplinary programs for assessing, forecasting and mitigating landslide risk over large areas;
3. to promote the creation of "on the job" vocational training programs aimed at solving real landslide risk problems using the most advanced theories and methodologies in the fields of geotechnical engineering, geomechanics, geology, mathematical modelling, monitoring, GIS techniques, etc.

The LARAM School has proven to be a very good concept and since its initiation almost 300 PhD students have followed this course. However, the participation of students from Asian countries should be increased considering that landslides are a relevant issue in this part of the World.

Moreover, it must be remembered that since 2009 LARAM School has been also supported by the EU FP7 SafeLand project that was also aimed to the harmonisation and development in the World of procedures for quantifying landslide hazard and risk. To this aim, India and China were selected as countries where interaction should be enforced between European and Asian landslide researchers.

Participation Target:

The LARAM course is intended for **40 PhD students** that are carrying out research in the field of landslide

hazard and risk assessment. Participants should be registered as PhD student in a University and not have obtained their PhD yet at the time of the course. The participants should have a background in one of the following fields: Geology, Geography, Civil Engineering, Environmental Engineering, Engineering Geology or other Earth Science disciplines. Participants must have a good knowledge of the English language as the course will be conducted in English.

The Class can also include a **maximum of 20 Young Doctors** who have discussed their PhD dissertation not earlier than 2006.

Organization:

The main sponsor of LARAM School 2012 is the State Key Laboratory of Geohazard Prevention and Geoenvironment Protection of the Chengdu University of Technology (CDUT-SKLGP) from Chengdu, China.

Lecturers:

The Lecturers belong to the Scientific Committee of LARAM with some other experts with international reputation coming from China, Hong Kong, Japan, Italy, the Netherlands and Austria.

Location:

The LARAM School 2012 will be conducted at the State Key Laboratory on Geohazards Prevention, of Chengdu University of Technology (SKLGP) which has very good facilities, including lecture rooms, computer rooms, laboratories, and a guesthouse. Fieldwork will be done in the nearby area where 60000 landslides were generated during the 2008 Wenchuan earthquake.

Dates:

The course is organized from 12 to 23 November 2012.

Costs:

The **40 selected PhD students** must pay their own travel to China. Room, meals and local transportation will be paid by the organizing institute SKLGP.

The **20 registered Young Doctors** must pay their own travel to China and a registration fee of 300 euro, including participation to the lectures and fieldworks as well as room, meals and local transportation.

Applications of PhD students:

The course is open to 40 PhD students, which will be selected through an international call. Applications should be made by filling in the application form and by providing a CV (max 2 pages) and 1 to 3 letters of

recommendation.

For application: http://www.laram.unisa.it/school/2012asia/application_phd_students.

The deadline for applications is 20 September and selected students will be announced by 30 September.

For information, you can send an email to laram@unisa.it.

Registration of Young Doctors:

The first 20 registered Young Doctors will participate to the LARAM School 2012 – 2nd Asia Course.

The deadline for registration is 20 September.

For application: http://www.laram.unisa.it/school/2012asia/registration_young_doctors

For information on payment, an email must be sent to sklgp2011@gmail.com.
