Programme of the LARAM School 2013: 1st week

	9.00	10.00	11.00	12.00	13.00	14.00	15.00	16.00	17.00	18.00
Mon 02/09	S1_a Cascini		break	S1_b Fell	S1_c Cascini	Lunch	S2_a Fell	break	S2_b Cascini	S2_c Ferlisi
Tues 03/09	S2_c (cont)	S2_d Fell	break	S2_e Cheung		Lunch	S2_e (cont)	break	S2_f Ferlisi	
Wed 04/09	S2_g Fell		break	S2_h-T Cheung		Lunch	S2_i-T Ferlisi	break	presentations by students	
Thur 05/09	S3_a Cascini		break	S3_b Calvello	S3_c-T Calvello	Lunch	S3_d Cascini	S2_e Cotecchia	break	S2_e (cont)
Fri 06/09	S3_e (cont)	S3_f Runqiu	break	S3_f (cont)		Lunch	S3_g Nadim	break	S3_g (cont)	
Sat 07/09	TECHNICAL VISIT									

S1 - SESSION "Introduction to landslide analysis" [3.5 hours]

a) Cascini (1.5 hours): Introduction to landslides. Landslides typology and classification.

b) Fell (1.0 hours): Key geological and geomorphologic issues.

c) Cascini (1.0 hours): The geotechnical slope model.

S2 - SESSION "Risk theory and QRA for landslides" [15.5 hours]

a) Fell (1.5 hours): Landslide risk management concepts and framework.

b) Cascini (1.0 hours): Landslide susceptibility analysis.

c) Ferlisi (1.5 hours): Elements at risk and their vulnerability.

d) Fell (1.5 hours): Landslide frequency analysis.

e) Cheung (3.5 hours): QRA experiences in Hong Kong.

f) Ferlisi (1.5 hours): QRA experiences in southern Italy.

g) Fell (2.0 hours): QRA application (debris flow) and case study (landslide in a reservoir).

h-T) Cheung (2.0 hours): TUTORIAL: QRA at site scale.

i-T) Ferlisi (1.0 hours): TUTORIAL: Nocera Inferiore QRA case study (1st part).

Special Session [2.0 hours]

Short presentation by students of the LARAM class (dealing with their PhD research)

S3 - SESSION "Landslide risk analysis and zoning: international experiences" [14 hours]

a) Cascini (1.5 hours): Landslide susceptibility, hazard and risk zoning.

b) Calvello (1.0 hour): Statistical methods for landslide zoning.

c-T) Calvello (1.5 hours): TUTORIAL on empirical methods for susceptibility, hazard and risk zoning at 1:25,000 scale.

d) Cascini (1.0 hours): The Italian experience.

e) Cotecchia (3.0 hours): Italian case study: slow-moving landslides in the Daunia region.

f) Runqiu (3.0 hours): Landslide risk analysis and zoning in China.

g) Nadim (3.0 hours): Landslide risk analysis and zoning in Europe: the "SafeLand" project.

Technical Visit [5.0 hours]

TUTORIAL: Nocera Inferiore QRA case study (2nd part).

Programme of the LARAM School 2013: 2nd week

	9.00	10.00	11.00	12.00	13.00	14.00	15.00	16.00	17.00	18.00
Mon 09/09	S4 Mem. Sorbino		break	S4 Mem. Sorbino		Lunch	S4_a Darve	break	S4_a (cont)	
Tue 10/09	S4_b Pastor		break	S4_b (cont)		Lunch	S4_c Alonso	break	S4_c (cont)	
Wed 11/09	S4_d di Prisco		break	S4_d (cont)		Lunch	S4_e-T Cuomo	break	S4_e-T (cont)	
Thur 12/09	S5_a Glade		break	S5_b Leroi		Lunch	S5_c Leroi	break	S5_d Glade	
Fri 13/09	S5_e Calvello	S5_f Lacerda	break	S5_f Lacerda		Lunch	S5_g-T Ferlisi Calvello	break	S5_g-T (cont)	Closing
Sat 14/09	DEPARTURE DAY									

S4 – MEMORIAL GIUSEPPE SORBINO “Research on geomechanics: from laboratory to large areas” [3.5 hours]

Welcome address (by Rector of the University of Salerno)

Cascini (30’): The advanced methods for slope stability analysis

Alonso (30’): Slope instabilities in unsaturated soils and laboratory testing for mechanical characterization

di Prisco (30’): Advanced slope stability analysis for liquefiable soils

Pastor (30’): The run-out assessment of fast-moving landslides

Cascini (15’): “Giuseppe Sorbino: the scientist, the teacher, the colleague”

Leroi (15’): “Giuseppe Sorbino: more than a friend”

Friends, PhD students and colleagues remembering Giuseppe (30’)

S4 – SESSION “The role of advanced methods in landslide risk analysis” [17.5 hours]

a) Darve (3.5 hours): Geomechanical modelling of landslides.

b) Pastor (3.5 hours): Modelling the initiation of catastrophic landslide events. Modelling the propagation of catastrophic landslide events, propagation of sediments.

c) Alonso (3.5 hours): Fundamentals of thermo-hydraulic-mechanical interactions in soils. Rapid drawdown and risks associated. Rapid landslides: practical criteria.

d) di Prisco (3.5 hours): Geomechanics and slope stability analysis of liquefiable soils

e-T) Cuomo (3.5 hours): TUTORIALS on landslide initiation (TRIGRS model) and propagation (SPH-Madrid code).

S5 – SESSION “Landslide risk management and mitigation” [13.0 hours]

a) Glade (2.0 hours): Landslide risk management strategies.

b) Leroi (1.5 hours): Tolerable risk criteria and the practical management of risk.

c) Leroi (2.0 hours): Landslide Risk Management at La Desirade Island and Pointe-Noir in Guadeloupe.

d) Glade (1.5 hours): Web-GIS for landslide risk.

e) Calvello (1.0 hours): Toolbox of landslide mitigation measures: deliverables 5.1 and 5.2 of European project “SafeLand”.

f) Lacerda (2.5 hours): Landslide risk mitigation in Brazil: structural works and early-warning systems (with Calvello).

g-T) Ferlisi, Calvello (2.5 hours): TUTORIAL on deliberative process for risk mitigation.

CONCLUDING REMARKS [1 hour]
